New Item

Enter an item name

java maver

Select an item type

**Freestyle project**
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.

**Pipeline**
Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

**Multi-configuration project**
Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

**Folder**
Creates a container that stores nested items in it. Useful for grouping things together. Unlike view, which is just a filter, a folder creates a separate namespace, so you can have multiple things of the same name as long as they are in different folders.

OK

ENG IN 13:56 21-03-2025

???welcome Aranganathan 79998wdd???

```
dhara... dharani@GOKUL: ~/capstone X + v
dhara... dharani@GOKUL:~/capstone/spring-framework-petclinic$ docker run -d -p 8090:8080 image name
Unable to find image 'image:latest' locally
docker: Error response from daemon: pull access denied for image, repository does not exist or may require 'docker login': denied: requested access to the resource is denied

Run 'docker run --help' for more information
dhara... dharani@GOKUL:~/capstone/spring-framework-petclinic$ docker login
